(801) 691-6970

Lehi, UT, 84043

Summary

Passionate software developer, seeking an entry-level programmer/software engineer position in an environment that values quality and maintainable code.

Education

Bachelor of Computer Science - Utah Valley University, Orem, UT

Aug 2016 - Dec 2020

Honors: summa cum laude (GPA: 3.97)

Work Experience

Computer Science Grader - Utah Valley University, Orem, UT

Aug 2019 - Dec 2019

- Graded and provided feedback on students programs, lab exercises, and coding assignments
- Answered students' questions and assisted professor as needed

Front Desk - Comfort Inn, Lehi, UT

June 2016 - Sept 2017

- Answered phone, made reservations, and provided customer service both in person and over the phone
- Performed general maintenance (basic repairs, computer maintenance, and shampooing)
- Assisted housekeeping, maintenance, and the general manager

Projects

Compiler

- Converts source code into assembly code
- Source code language is based on a hybrid of C# and C
- Supports inheritance, polymorphism, and multithreading
- Written in C++

Assembler and Virtual Machine

- Converts assembly code into bytecode which can be run by the virtual machine
- Based on Reduced Instruction Set Computer (RISC) instruction Set Architecture (ISA)
- Supports multithreading
- Written in C++

Client-server chat application

- GUI based application similar to IRC, with the ability to connect to a chat server to send and receive messages from server members
- Supports whiteboard
- Written in C++ using WNLIB

TCP-IP networking library [WNLIB]

- TCP networking library which served as the base for writing a Client-Server chat application
- Written in C++ using Windows API and IO Completion Ports

Type-erased function container library

- Library which enables the ability to conditionally call functions at compile time based on the parameters passed, and enables those functions to be stored in statically-typed containers (such as an array/vector/arraylist)
- Written in C++ using template metaprogramming

Discord bot

- Elo bot for a SC2 arcade game, allows server members to join a queue to play against each other and generates a balanced team matchup based on player skill levels
- Written in Python using Discord.py and PostgreSQL

Technical Skills

- Programming experience: C++ (advanced) C# with .NET framework (intermediate), Python (Intermediate), C (Intermediate), Rust (beginner), Java (beginner), SQL (beginner)
- Familiar with object oriented programming, programming principles, and software design patterns
- Strong problem solving, debugging, and troubleshooting skills
- Source control/project management tools: Git, Atlassian, Jira, Team Foundation Server
- Operating systems/software: Windows, Linux, Visual Studio, Visual Studio Code, Docker, CMake, Qt
- Confident working in agile teams and individually
- Familiar with Continuous Integration/Continuous Deployment (CI/CD) and tools such as Bitbucket pipelines and Jenkins
- Familiar with databases, computer architecture, and computer networks
- Familiar with unit testing, integration testing, and test driven development
- Familiar with game development
